

# DuroPax

# ALL-DAY FRESHNESS

Here's how DuroPax provides all-day\* antimicrobial surface protection for passengers and crew.

\*Up to 48 Hours of Protection

\*DuroPax is especially formulated to keep passenger spaces fresh and germ-free for the FULL TERM\* of a daily cleaning cycle.

Long-term DuroPax is unlike any conventional disinfectant cleaner. It's significantly better — a safer, modern and longer-lasting alternative that offers major advantages over the short-lived, toxic chemicals we've come to use as standard.

### How is DuroPax better?

**1. IT'S SAFE.** DuroPax won't harm you or the surfaces you treat. Unlike conventional cleaner disinfectants, which can emit toxic fumes and bleach, stain and burn, DuroPax is safe to use on all kinds of surfaces and around children, adults and pets.

### 2. IT'S LONGER LASTING.

The antimicrobial effects of conventional disinfectant cleaners evaporate and are gone within minutes; DuroPax keeps on protecting and deodorising treated surfaces for the whole duration of a daily cleaning cycle\*.

**3. IT'S VERSATILE.** DuroPax won't burn, bleach or stain, and is suitable for all kinds of hard and soft surfaces — plastics, metal, vinyl, leather, rubber, woven fabrics, carpets, wood — in fact, any firm, water-resistant surface you might want or need to protect.

### What's it good for?

DuroPax is a modern cleaner disinfectant, especially formulated for cleaning and protecting frequently touched surfaces and actively supporting the all-day maintenance of passenger cabin hygiene, in all kinds of passenger transport vehicles. DuroPax first helps you clean the surface, then sets up an effective, 48-hour biostatic barrier that controls the presence and growth of pathogenic and odour causing bacteria, mould and other microbes, over the full term\* of a regular cabin cleaning cycle.

# How to use DuroPax — the world's most advanced passenger cabin surface protection against harmful bacteria, odours and mould.

## 1. Understand the Product

DuroPax is a combination cleaner-disinfectant unlike any conventional product. It contains DuroKleen, a modern, eco-friendly and longer-lasting\* surface-protecting disinfectant that offers superior performance in the control of harmful pathogens, odour causing bacteria, mould and algae. It is easy to apply and emits no toxic fumes.

DuroPax works by first helping you to clean the surface, and then self-assembling as it dries into a safe yet powerful, invisible antimicrobial barrier that keeps on controlling unwanted microbes and mould for the full term\* of a regular cleaning cycle. It is suitable for both cleaning and disinfecting any hard or soft, water-resistant surface, including woven fabric. Detailed instructions are printed on the product label.

## 2. Follow the User and Safety Instructions

Please read the user and safety instructions on the product label. Do not allow DuroPax to make contact with your eyes. Wash your hands and skin after exposure, and do not apply DuroKleen to foodstuffs. If poisoning occurs, follow the instructions printed on the label. If necessary, consult a qualified medical practitioner.

## 3. Directions for Use

1. Tidy

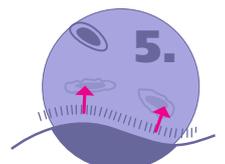

2. Prepare

3. Spray

4. Wipe

5. Job Done

## 4. What to expect from DuroPax

Unlike the short-term disinfectant solutions offered by traditional cleaner-disinfectants, DuroPax, powered by DuroKleen, cleans, sanitises and then keeps on protecting your treated surfaces for the full term, and more, of a daily cleaning cycle\*.

- ✓ POWERFUL ANTIMICROBIAL PROTECTION THAT OUTLASTS THE FULL TERM OF A DAILY CLEANING CYCLE\*
- ✓ EASY TO USE, EMITS NO TOXIC FUMES AND WILL NOT BLEACH, STAIN, BURN OR CHEMICALLY DEGRADE THE SURFACES YOU TREAT
- ✓ SUITABLE FOR ANY WATER-RESISTANT SURFACE — PLASTIC, METAL, VINYL, LEATHER, RUBBER, FABRICS, CERAMICS, CARPETS, WOOD
- ✓ MULTI-FUNCTIONAL — CLEANS AND SANITISES IN ONE EASY ACTION

\*Up to 48 Hours Continuous Protection
