

BRAINS FOR YOUR WATER METER™

"The purchase of your valves has proven to be a very good return on investment...we look forward to installing another SMART VALVE in our new building."

—Bob Pack, General Manager,
Grand Central at Kennedy
Tampa, Florida

Reduce Your Water Bill

Smart Valve's patented Variable Flow Control process eliminates water meter inaccuracy and excessive water consumption.

Smart Design, Smart Money

The SMART VALVE was created to resolve the inefficiencies inherent in water delivery and consumption. Our patented and NSF certified process takes established principals of fluid dynamics and applies them in a new and financially rewarding application.

Is there air in my water? Am I paying for it?

In the volume of water passing through your water meter, there is also a volume of air, and your water meter can't tell the difference! To measure water consumption, the most common water meters use a method known as Positive Displacement. This method is not limited to water: it measures the total volume of both water and air.

How does the Smart Valve work?

The SMART VALVE compresses air, eliminating its volume before it reaches the water meter—the meter no longer measures it! You pay less for the same water usage!

The 2nd Generation Smart Valve is EXTERNALLY ADJUSTABLE for maximum performance EVERY TIME! Fine tunes the setting perfectly to your facility and has ability to adjust to future system changes without ever having to turn off your water again. No other product has this patent pending feature.

SMART VALVE™

BRAINS FOR YOUR WATER METER™

“ Since installing the valve to our main water line at the Doubletree Tarrytown we have seen consistent savings on our monthly water bill of 10% to 15%. This is phenomenal and has helped improve our bottom line! ”

—Rich Friedman, General Manager
Doubletree, Tarrytown

Patent #US 8,707,981
Patent #US 10,544,569
NSF/ANSI 61 & 372 certified

Specifications

Valves are available in all standard plumbing sizes. The valve is made in double flanged and double threaded (female NPT) configurations according to your system pipe size.

The 2nd Generation Smart Valve has a much larger ID than older designs to match pipe flow capacity.

* Applications include: hotels, apartments, restaurants, laundromats, car washes, food/beverage, manufacturing, landscape irrigation, and many more.

Installation

The SMART VALVE™ is designed to be installed on the USER side of the water meter. Installation should be performed by a licensed plumber.

Smart Valve is a ‘Set it and Forget it’ device. No maintenance, no operational costs and comes with a 10-year warranty.

Customer Case Study

Property: Vista Del Sol HOA
Property Location: Rancho Mirage
Property Description: Landscape Irrigation
Reduction Percentage: 32%
